PLANT BREEDING IN FOOD PRODUCTION - CBIO WEBINAR

20 September 2022 at 15:00 to 16:30

The increasing need and demand for plant based foods calls for much more focus on plant properties – e.g. protein content and quality - in future plant breeding. Sign up for this webinar and learn more about the future demands to plant breeding, and what the plant breeders are working on.

15:00-15:05 Welcome and introduction

15:05-15:20 Plant proteins – what is needed?
By Trine Kastrup Dalsgaard, Dept. of Food Science, Aarhus University

15:20-15:40 Breeding for sugar, starch, and protein - today and in the future
by Christian S Jensen, DLF

15:40-16:00 Breeding of faba beans and lupine at Nordic Seed
by Andrea Schiemann, Nordic Seed

16:00-16:20 Genomics-based breeding in faba bean
by Stig Uggerhøj Andersen, Dept. of Genetic and Molecular Biology, Aarhus University

16:20-16:30 Final discussion

Sign up for the webinar here:
<https://tilmeld.events/plantbreeding>
before 19 September, where you will receive a link by mail.
